3-D Explorer: Dinosaurs: A Journey Through The Prehistoric World (3D Explorers)

Synopsis

3-D Explorer: Dinosaurs offers kids a window into the early days of our planet. A fun and interactive 3-D tour, it features stunning pop-up scenes that reveal the lives of the mighty Stegosaurus, Raptor, Megasaurus, and other fascinating dinosaurs. Unique transparent layers give readers a glimpse of the unusual habitats of these prehistoric creatures. Kids will discover how dinosaurs evolved from small predators to the largest land animals of all time, and then meet the fierce reptiles of the oceans and the skies. Imagine a time when the Triceratops walked the earth. When the roar of the Brontosaurus could be heard for miles. When the Pterosaurs soared through the skies. Millions of years ago, these magnificent creatures roamed the same lands we now live in. It's a time that now seems impossibly far away in the past—but there are ways to understand what life was like in that prehistoric era. Covering the Triassic period to the Jurassic period and everything in between, 3-D Explorer: Dinosaurs is packed with eye-catching images and intriguing facts about the daily lives of dinosaurs.

Book Information

Series: 3D Explorers

Customer Reviews

My four year old son loves everything dinosaur. This book is packed with action, colors, and information. It's sturdy with thick pages and can take some abuse by small hands. The 3-D scenes

are beautiful and appealing. The layout is fun and entertaining. This book holds my sons attention for a while, which is always a plus for anything. He already had the 3-D Explorer: Oceans, so this was a wonderful addition to his book shelf. I highly recommend this book.

My sons love dinosaurs especially T-Rex. This 3D book amazed them and I enjoyed it as well. This book was really cool and we enjoyed it's content and the excellent 3D imagery. Made my boys wanting more information on all the dinosaurs contained in the book. The book didn't have Spinosaurus, Giganotosaurus, Mapusaurus, Albertosaurus or Deinonychus in it. Which are some of the largest predator dinosaurs to walk the earth. My kids can't get enough of them. Hopefully Silver Dolphin Books will do a follow up book and include some of the other dinosaurs that weren't in here. If they do make another 3D book on dinosaurs I'll snatch it up for my kids, like you should snatch this book up for your kids because they'll love it.

This is not just a pop-up book, this is dimensional. Kids love the books, like a mini-exploration. fantastic learning tool that is quite fun.

The Book is great with Beautiful pictures and the is made of very hard papers that can take lots of impact. My daughter loves it so much.

Great purchase. Used book but excellent condition.
